

GSK Mayenne Penicillins Business Unit

Excellence, Partnership, Passion

Introduction

The GSK Mayenne site is located in the Pays de la Loire region of North West France, approximately 250Km West of Paris.

The site specialises in the manufacture of penicillins in oral solid dose forms including tablets, capsules, sachets and dry syrups, with operations running from granulation to packaging.

Key capabilities

Direct compression

Dry granulation

Film-coating

Taste masking

Modified release dose forms.

The Mayenne development team specialises in new formulations and novel mechanisms for administration, using innovative technologies.

Regulatory Approvals

The Mayenne site supplies:

Europe,
Eastern Europe,
Africa,
Asia Pacific,
Central and Latin America.

It is a European licensed facility,
Anvisa inspected.

It also holds ISO 14001 and OHSAS 18001 Certification.

Overview

The Mayenne site is expert in the manufacture of oral solid dose forms and in packaging formats including blisters, sachets and bottles. The site's fully trained staff are experienced in cGMP manufacturing, testing and release, with a quality system aligned to international regulatory standards and a full range of analytical methods to support all products.

It is a major supply site for GSK's Augmentin and Clamoxyl ranges in all markets outside the US, and has more than ten years' experience in manufacturing on behalf of non-GSK customers.

Expert Technical Development teams can develop new formulations and implement process optimisation as well as change formulations (actives and excipients).
