

Worthing and Mayenne

Product Catalogue

Editorial

Shay Keane
Logistics Director Worthing

Joël Maestre
Logistics Director Mayenne

Dear Customer,

The product catalogue you have in your hands is designed to share with you the range of products manufactured and supplied from our Mayenne and Worthing sites. Its purpose is to allow you to check whether there are products of interest and opportunity for your market. We hope that in making this information available, you are better able to shape your portfolio and exploit available sales opportunities.

Both manufacturing sites are focussed on the production of tablet, capsule, syrup, sachet and vial presentations with a secure source of supply covering over 120 markets worldwide.

We are committed to continuously working to reduce costs while maintaining our high quality and supply performance levels.

Please circulate this product catalogue as appropriate within your marketing organisation. In addition please be aware this is not a definitive list of all our products, therefore, please contact us so that we can discuss what best fits with your requirements.

Best regards

Shay Keane and Joël Maestre
