

GSK_SE_2024_EFPIA_HCPO_Methodological_Note_ENGLISH

Villkor	Definition
Corporate scope	GSK will issue one report for each country showing all Transfers of Value made to HCPs / HCOs in that country by GSK and by ViiV Healthcare.
Reporting date	<p>GSK has defined two types of Transfers of Value for Reporting Date purposes:</p> <ul style="list-style-type: none"> - a Monetary Transfer of Value is a payment of money made to an HCP/HCO by GSK either directly or through an intermediary (for example, fees for service). The Reporting Date for these Transfers of Value will be the actual payment date, irrespective of when the event happened (for example, when a consultancy fee is paid, not when the work took place). - a Non-monetary Transfer of Value is a benefit received from GSK either directly or through an intermediary without a monetary payment (a flight or a fee paid to a travel agent or events organiser, for example). The Reporting Date for these Transfers of Value will be the event date (for example, when the event took place).
Value Added Tax	GSK has taken the decision to report values including VAT wherever possible due to the complexity of VAT regimes around Europe and the inconsistency of whether VAT may or may not be reimbursable depending on where the transaction took place and the country of residency of the HCP or HCO. All other taxes are included in the reported values.
Currency conversions	GSK records Transfers of Value in the currency in which the transaction took place. The report will show all values in the currency of the country in which the report is made.
HCPs employed by GSK	GSK will not report payments made to HCPs who are employed by GSK as staff members. GSK considers that it would be inappropriate to disclose an employee's salary, bonus, expenses and benefits.
Multi-year contracts	Transfers of Value are reported on the relevant Reporting Date (payment date or event date – see above) irrespective of the duration of the contract.

GSK is disclosing Transfers of Value related to *Retrospective* Registry Trial and as such these Transfers of Value should be reported on a named basis according to EFPIA guidance found in “The EFPIA Disclosure Code: Your Questions Answered”.

GSK is disclosing Transfers of Value related to trials not performed under the standard of Good Laboratory Practice and as such these Transfers of Value should be reported on a named basis according to EFPIA guidance found in “The EFPIA Disclosure Code: Your Questions Answered”.
