Global patient group funding

The Global Asthma and Allergy Patient Platform

GAAPP is a global association of organizations advocating the rights and interests of people living with allergies and asthma. GAAPP was established in 2011 in Istanbul, Turkey, during the EAACI meeting. Currently, GAAPP consists of 34 member organizations on all continents. The mission of GAAPP is to support patients with allergies and asthma throughout the world by protecting their rights and insisting on the duties of governments, healthcare professional organizations and the general public.

We have supported this organisation in 2013.

During 2018

- We provided £929 GAAPP consultancy fee for attendance at GSK’s Patient Advocacy Advisory Board (PAAB).
- We provided £61,929 in-kind support for the Define your Asthma campaign that provided a suite of social media assets for use by member organisations at a local level.
- We provided a Medical grant of £34,000 for GAAPP to develop educational resources.
- We provided £65,629 in-kind support for the Patient Understanding Leading to an appropriate Severe Asthma Referral initiative (PULSAR), aiming to develop and disseminate a global, patient centered definition of severe asthma in order to help improve patient understanding and change patient behaviour.

Our support represented 35% of their overall income.

During 2017

- We provided a restricted grant of €28,500 for raising awareness of Severe Asthma characteristics, diagnosis and treatment options.

Our support represents 21.86% of their overall income.
