Pharmaceuticals

- Our Pharmaceuticals business has a broad portfolio of innovative and established medicines
- We have been a leader in respiratory medicine for nearly 50 years and remain at the forefront of scientific research in this area, offering innovative medicines aimed at treating patients' symptoms and reducing the risk of their disease worsening
- We also have a long-standing commitment to HIV and are investigating new paradigms for treatment, prevention and cure
- In 2017, we had two best-in-class medicines approved: Trelegy Ellipta, our once-daily triple therapy for chronic obstructive pulmonary disease (COPD) in a single inhaler; and Juluca, the first two-drug regimen, once-daily, single pill for HIV

R&D/Pipeline:

- As GSK and through our heritage companies, we have a 150-year legacy of applying science to discover and develop new [medicines](#), [vaccines](#) and [consumer healthcare](#) products that help to transform lives.
- 2017 total R&D expenditure: £3.9bn
- ~11,500 R&D employees globally

Trust/Corporate Responsibility and Global Public Health:

- GSK has topped the Access to Medicine Index since the biennial assessment began in 2008. In 2017, we also led the industry in the first ever Access to Vaccines Index, as well as the first Anti-Microbial Resistance Benchmark in early 2018
- We were ranked no. 1 in the AllTrials Transparency Index, building on our long-standing commitment to transparency in clinical trials
- We improved our ranking from third to second in our industry in the Dow Jones Sustainability World and Europe Indexes in 2017. This places us in the top 2% of our sector for economic, environmental and social performance
- Our RTS,S vaccines is the only malaria vaccines that has received a positive scientific opinion from the European Medicines Agency (EMA) and a recommendation for pilot implementation by the WHO
- We have reached 2.7 million children in 41 countries with life-saving interventions since the beginning of our five-year partnership with Save the Children
- We have cut operational carbon emissions by 21% since 2010. Total value chain emissions have risen by 4% as we extend access to our medicines, and we are working to address this
