

Argentina patient group funding

HIPUA – Hipertensión pulmonar Argentina Asociación Civil (Social Association of Pulmonary Arterial Hypertension)

HIPUA is the only association of patients with pulmonary hypertension in Argentina. Their objective is to generate, by this mean, a space for communication and exchange between patients as well as providing permanently updated information (without this replacing the medical consultation at all) in order to improve the patient's quality of life and ensure the full exercise of their rights.

We have supported this group since 2013.

During 2019:

- GSK provided a grant of £ 4322,28, for publishing a magazine with the objective of sharing updated information on PAH. This magazine will be distributed among patients and their families in medical congresses and meetings.

Our support represented 50 % of their overall income
