

ESG Performance Summary 2020

About this report

Trust is one of our three long-term priorities and is essential to how we achieve our purpose, drive long-term growth and add value for society and our shareholders.

We have 13 commitments that support our Trust priority and drive progress in the key areas where we can make a significant impact, and ensure that we are running our business in a responsible way.

These commitments seek to address the most material topics relevant to our stakeholders and to our business, and are designed to help us respond to challenges and opportunities within our industry and society more broadly. They contribute to many of the UN Sustainable Development Goals, and as a science-led, global healthcare company, our biggest contribution is towards Goal 3: ensure healthy lives and promote well-being for all at all ages.

Cautionary statement

See page 32 of this document for the cautionary statement regarding forward-looking statements.

About our reporting

This document provides a comprehensive summary of environmental, social and governance (ESG) data from across our business. This complements our wider reporting on responsible business in our <u>Annual Report</u> where we report progress on our 13 Trust commitments and in the responsible business pages of <u>gsk.com</u>.

In this report:

Our commitments	1
Data summary	2
SASB index	17
United Nations Global Compact Communication on Progress	20
Global Reporting Initiative guidelines	25
Assurance report	30
Public policies available online	32

In our Annual Report:

Stakeholder engagement

Progress against our Trust commitments

Climate change resilience (TCFD)

Other online reporting:

Materiality assessment

Human rights

Sustainable Development Goals

Political advocacy

Patient group funding

Trade association memberships

Charitable grant contributions

Criteria for working with Public Policy Groups

Modern Slavery Act Statement

Our commitments

The 13 commitments detailed below support our Trust priority and drive progress in the key areas where we can make a significant impact, and ensure that we are running our business in a responsible way. We report our progress in the GSK Annual Report.

Using our science and technology to address health needs

New medical innovations

Develop differentiated, high-quality and needed medicines, vaccines and consumer healthcare products to improve health

Global health

Improve global health impact through R&D for infectious diseases that affect children and young people in developing countries focusing on HIV, malaria and TB

Health security

Help the world to better prepare for future disease outbreaks with pandemic potential, and tackle antimicrobial resistance

Making our products affordable and available

Pricing

Improve the health of millions of people each year by making our products available at responsible prices that are sustainable for our business

Product reach

Use access strategies to reach 800 million undeserved people in developing countries with our products by 2025

Healthcare access

Partner to improve disease prevention, awareness and access to healthcare services by 12 million people by 2025

Being a modern employer

Engaged people

Achieve and maintain a competitive employee engagement score by 2022

Inclusion and diversity

Accelerate our progress on inclusion and diversity, including aspirational targets for female and ethnically diverse representation in senior roles by end 2025, and recognition as a disability confident employer and in LGBT+ indices

Health, wellbeing and development

Be a leading company in how we support employee health, wellbeing and personal development

Being a responsible business

Reliable supply

Commit to quality, safety and reliable supply of our products for patients and consumers

Ethics and values

Operate an ethical, values-driven culture, in which any issues are responded to swiftly and transparently

Data and engagement

Use data responsibly and transparently. Improve patient and scientific engagement

Environment

Have a net zero impact on climate, and a net positive impact on nature by 2030

Data summary

		2017	2018	2019	2020
General company inf	ormation

	Change in combined average net price for our pharmaceutical and vaccines portfolio in the US since the previous year ³	_	_	-5.0%	-0.7%
	Change in average list price in the US since the previous year ³	_	_	+2.5%	+3.2%
	5 Year List and Net Price CAGR (Compounded Growth Rate)			2015-19	2016-20
	Change in net price (after discounts, rebates or other allowances) for our products in the US over the past 5 years. ³	_	_	-4.0%	-3.2%
	Change in average list price in the US over the past 5 years ³	_	_	+6.4%	+5.7%

¹ A new methodology to more fully account for the administrative costs of the Bridge to Access and Benlysta/Nucala patient assistance programs has led to a significant increase in management costs over 2018.

² Mass drug administration programmes were disrupted/paused in 2020 due to the COVID-19 pandemic, leading to reduced donation numbers.

³ Calculated across GSK and ViiV Healthcare products.

		2018	2019	2020	Total	Notes
Access and affordability	(continued)					
Product reach target (800 million by 2025,	People with access to a generic dolutegravir product through voluntary licensing agreements ('000)	-	-	16,300	16,300	As a chronic and ongoing treatment we only include the cumulative total number with access rather than annual data.
against a 2018 baseline)	Estimated children reached with Synflorix through Gavi ('000) ¹	20,800	20,700	17,100	58,600	Based on 3 doses per course, and WHO estimates of 8% wastage (10% for 2018).
	Estimated children reached with Rotarix through Gavi ('000) ¹	26,300	21,200	25,400	72,900	Based on 2 doses per course and WHO estimates of 4% wastage (5% for 2018).
	Estimated girls reached with <i>Cervarix</i> through Gavi ('000) ¹	810 ²	45	180	1,035	Based on 2 doses per course and WHO estimates of 10% wastage.
	Estimated people reached with the Oral Polio Vaccine (OPV) ('000)	54,900	40,700	21,800	117,400	Based on the WHO recommended 4 doses for polio-endemic countries, and WHO estimates of 20% wastage
	People reached through our US Patient Assistance programme ('000)	126	123	95	344	
	People reached with our products through access strategies ('000)				266,579	
Health access target (12 million by 2025,	People accessing a healthcare service, worker, or educational session through our work with Save the Children ('000)	222	355	400	977	
against a 2018 baseline)	People accessing Malaria services through our Comic relief partnership ('000)	397	1,100	1,703	3,200	
	Healthcare workers trained through our partners ('000) ³	20	18	16	54	
	People accessing a healthcare worker, service or facility as a result of the health worker training programmes ('000) ³	2,200	2,000	3,5384	7,738	
	People reached through ViiV Healthcare's Positive Action for Children Fund (PACF) grants ('000)	536	638	484	1,658	
	Children accessing treatment/care for cleft conditions through the Smile Train partnership ('000)	4.1	3.5	2.3	9.9	
	HCPs/pharmacists trained through our partners in SE Asia and India dengue fever programmes ('000)	1.1	3.7	-	4.8	Programme paused in 2020 due to agreement with our NGO partner to shift focus to COVID-19 relief efforts.
	People accessing dengue fever services through our partners in India ('000)	103.7	147.5	-	251	Programme paused in 2020 due to agreement with our NGO partner to shift focus to COVID-19 relief efforts.
	People reached through our programmes to improve disease prevention, awareness and access to healthcare services ('000)				13,893	

¹ Gavi may distribute these at different times, but within the year we provided this many doses with the potential to reach the stated number of people.

^{2 2018} data was driven by a combination of the routine programme and multi-age cohorts as part of HPV demonstration projects.

³ Data is estimated based on previous reach through the same partner programmes and level of funding. Final 2019 data is available in April 2020.

⁴ In 2020, this captures figures from our frontline health worker training programme as well as our new CEO Roundtable collaboration.

People (continued)					
Ethnic diversity: US	Ethnically diverse total	23.2%	25.3%	29.3%	30.0%
	American Indian or Alaska Native	*	0.4%	0.3%	0.4%
	Asian	10.8%	13.8%	15.9%	12.9%
	Black or African American	5.8%	5.5%	6.3%	9.9%
	Hispanic or Latinx	5.0%	4.5%	5.1%	5.1%
	Native Hawaiian or Other Pacific Islander	*	0.3%	0.1%	0.2%
	Two or more races	1.2%	0.9%	1.6%	1.5%
	White total	76.8%	74.7%	70.8%	70.0%
Ethnic diversity: UK	Ethnically diverse total	11.1%	16.7%	21.8%	18.7%
	Asian	5.7%	11.8%	16.0%	13.1%
	Black	1.6%	1.8%	2.3%	2.5%
	Mixed	1.2%	1.5%	1.8%	1.8%
	Other	2.5%	1.6%	1.6%	1.3%
	White total	88.9%	83.4%	78.2%	81.3%

The data above represents those that responded to identify a race or ethnicity category. In the US, 6.3% of employees did not actively respond to identify a race or ethnicity category, and a further 1.2% indicated 'I prefer not to say'. In the UK, 11.5% did not actively respond and a further 3.9% indicated 'I prefer not to say'. As this is our first year reporting ethnicity data, we do not have comparable historic data. We will start to report this from our next report.

^{*} Insufficient data to report (Fewer than 3 employees)

Political engagement						
	Spend on federal lobbying activities (\$m)	4.18	4.57	4.4	3.8	Data is registered on the US Federal Lobbying Register and includes cost of operating our office in Washington DC, and cost of travel and consulting.
	Cost of representing our interests to EU institutions (€m) ⁴	1.48	1.73	1.64	1.82	This data is published on the EU Transparency Register.
	Political Action Committee contributions from US employees to state and federal candidates ('000 \$)	385	345	265	367	A breakdown of PAC spend is available online.
Clinical trial transpare	ency					
Clinical trial data⁴	Publicly available trial result summaries	_	_	_	6,168	
(cumulative)	Studies with Clinical Study Reports posted to the register	_	_	_	2,708	
	Trials listed for which patient level data is available for request	_	_	_	2,480	
	Research teams approved for access to GSK trial data		_		179	

¹ In 2018, we changed the way that we collect disciplinary data to improve clarity, for example removing a number of categories that we do not deem to be a behavioural policy violation (such as sanctions as a result of absence from work due to illness). The reduced number in 2018 reflects these changes.

² Individual employees can be subject to multiple allegations resulting in disciplinary action.

³ Policy violation types that do not fit into the categories specified.

⁴ This includes the latest available figures from the previous year. Figures from the reporting year are published in April, after publication of this document.

⁵ New methodology introduced for 2019.

Environmental Data Terminology

KPI	Definition	Method
Reporting Boundary	The published environmental data covers facilities owned or leased by GSK and its joint venture partners over which GSK has full operational control, except for small commercial offices and distribution centres, who are not required to report environmental impacts unless one of the following criteria are met: — total energy usage >4750 MWh per annum	GSK publish data aligned with the calendar year. However, December 2020 values include estimates based on December 2019 values as actual data is not available in time for publication. Data was restated for 2019 to correct for December estimates during that reporting period.
	- total water in is > 10,000 m3 per annum	Our baseline year for environmental targets is 2016.
	- total waste generated >250 tonnes per annum	Environmental data for the sites that joined the GSK network as part of
	This ensures that GSK is reporting > 95% of its environmental impacts.	the GSK-Pfizer consumer healthcare JV is integrated with GSK data.
Energy	This includes all purchased energy such as grid electricity, natural gas, coal, diesel and other fuels and renewably generated energy such as from solar, wind	Energy data is based on invoice data from utility companies and meter readings.
	or biomass. Purchased renewable electricity is renewable electricity generated by a supplier that is purchased under a supply agreement that includes evidence of origin such as REC, REGOs or as part of a Power Purchase Agreement PPA.	Purchased renewable electricity is allocated to a site once evidence of a supply contract is in place. Retirements of Certificates of Origin may occur after the reporting period.
Water	This includes all water supplied or withdrawn by GSK.	Water data is based on invoice data from suppliers and meter
	Captured rainwater and recycled water are measured and reported but not included in the 'total water used' calculation.	readings at our sites.
High Water Risk	This includes all water supplied to sites identified by GSK as a high water risk site.	GSK mapped the geographic location of its sites against outputs from the assessment tools WRI Aqueduct and WWF-DEG Water Risk Filter to identify sites in regions of high-water stress.
	GSK originally identified 13 high risk water sites, but due to network changes, there are currently seven high risk water sites in our network: Cape Town, South Africa Boudouaou, Algeria Jamshoro, Pakistan	A more detailed water stewardship risk assessment covering local water availability, water quality, the local regulatory framework and access to water and sanitation was then performed to classify whether a site is determined to be a GSK high water risk site.
	Karachi F268, Pakistan Karachi West Wharf, Pakistan Nashik, India Oak Hill, USA	Following a review in 2020, the site in Xochimilco, Mexico was removed and the site in Jamshoro, Pakistan was added to the list of high water risk sites. The data from 2016 has been restated to reflect this change.
		GSK have not yet completed water stewardship risk assessments for the sites that joined the network as part of the Pfizer consumer healthcare JV.
Waste water	This includes all wastewater sent to a municipal sewer, discharged to surface water after treatment on site, waste water used for irrigation, wastewater used to recharge aquifers in accordance with local regulations.	Wastewater data is based on invoice data from utility companies, meter readings, or a calculation based on water use in the absence of a meter.
	Liquid waste such as waste solvents that contain water are reported separately as wastes.	

Environmental Data Terminology continued

KPI	Definition	Method
Scope 1 Carbon emissions	GSK Scope 1 emissions cover emissions from the direct combustion of fuels on our sites to generate heat and electricity; emissions from our sales force	Carbon emissions are calculated as CO2 equivalent per the GHG Protocol Corporate Accounting and Reporting Standard.
	losses from refrigerants used in GSK owned ancillary equipment and from on-site waste and waste water treatment. nat Go	Carbon emission factors and calorific factors for the combustion of natural gas, diesel, coal and other fuels are taken from the UK Government emission conversion factors for greenhouse gas company reporting 2019 edition.
		Carbon emissions for sales force travel are calculated based on distance travelled, not directly on fuel use and have added an estimate (approx. 10%) for offices where distance driven data is not available.
		Carbon emissions from refrigerant losses are based on the quantities of refrigerant used to top up equipment.
		Biogenic emissions are reported separately but not included in the Scope 1 & 2 total emissions.
Scope 2 Carbon emissions	GSK Scope 2 emissions include any purchased electricity, steam, compressed air and chilled water.	Carbon emission factors for purchased electricity are taken from the International Energy Agency Statistics – CO2 from Fuel Combustion 2019 edition. GSK use market-based scope 2 emissions for reporting purposes.
		Carbon emission factors for purchased heat, steam and chilled water are taken from the UK Government emission conversion factors for greenhouse gas company reporting 2019 edition
		GSK are restating scope 2 emissions from electricity for 2018 and 2019 based on the updated IEA emission factors published in 2019.
		GSK report market-based Scope 2 emissions for facilities where there is evidence from the utility provider of low carbon energy generation such as certificates of origin (REC, REGO, PPA) or hydroelectric local grid supply e.g. in the Quebec Region
Scope 3 Carbon emissions	GSK report all 15 Scope 3 categories as detailed in the Greenhouse Gas protocol.	Scope 3 data across all 15 categories were prepared by GSK using a hybrid model combining primary activity-based data where available, and economic data. The model was quality assured by the Carbon Trust.
		Scope 3 emissions for business travel by air are based on ticketing information not directly on fuel use.
		Scope 3 emissions from patient use of metered dose inhalers are based on the numbers of inhalers leaving manufacturing sites for distribution, and the amount of propellant in each inhaler.

Environmental Data Terminology continued

KPI	Definition	Method
Waste	'Waste generated' is the operational waste that leaves GSK boundaries.	Waste data is based on invoices and waste transfer note data.
	'Beneficial use' waste is defined as waste sent for recycling, re-use, or incineration with energy recovery.	
	'Non-beneficial use' waste is defined as waste disposed by either incineration with no energy recovery or sent to landfill.	
Waste to Landfill	Waste to landfill includes both hazardous and non-hazardous waste that is disposed in landfill	Waste to landfill data is based on invoices and waste transfer note data.
		In some cases, local laws and regulations require certain waste be sent to landfill. For some types of waste (e.g. asbestos waste) landfill is the best environmental option.
		We include these wastes as waste sent to landfill in our data table, but we also allow the small number of sites affected to claim 'zero to landfill' status.
Ozone depleting substances contained in equipment	We report the ozone depleting potential for the total amount of ozone depleting substances contained in ancillary equipment as kg CFC-11 equivalents.	The total amount of ozone depleting substances is based on site inventory data multiplied by the ozone depleting potential factors from the Intergovernmental Panel on Climate Change.
		We estimate the impact of fugitive losses for these refrigerants.
		We are excluding the inventory from a small number of sites where GSK do not own or manage the refrigeration equipment
GSK reportable incident	A GSK reportable injury or illness meets the following criteria: 1. The affected individual is either a GSK employee or a complementary worker under direct GSK daily supervision; and	To be consistent in our global reporting, a GSK reportable injury or illness meets these listed criteria. These criteria are different from national regulatory reporting requirements which vary across the world.
	 2. The incident is work related; and 3. The outcome has involved at least one of the following: A fatality; Loss of consciousness; 	A lost time incident is one that has resulted in either days away from work or a job restriction when the employee is unable to perform one or more routine activities. Lost or restricted days are counted from the day following the incident.
	 Medical treatment beyond first aid; A significant occupational injury or occupational illness diagnosed by a physician or other licensed health care professional; Restricted days/change of job duties/days away from work; and Must be a new case 	Hours worked is calculated based on the number of working days in year, the length of an average workday, and the number of employee by site as provided by GSK Human Resources. Employees include full time employees and directly supervised agency staff.
		GSK are restating incident data for 2019 to account for a small number of incidents that occurred in 2019 but the records were not complete when the table was prepared last year. Incident rates are calculated per 100,000 hours worked.

List of products on the WHO List of Prequalified Medicinal Products and Vaccines as part of its Prequalification of Medicines Programme (PQP)

	Type, form and presentation	Date of prequalification
Vaccines		
Engerix	Hepatitis B – Liquid: ready to use vial (1 dose)	Thursday, 1 January 1987
Engerix	Hepatitis B – Liquid: ready to use vial (10 doses)	Thursday, 1 January 1987
Engerix	Hepatitis B – Liquid: ready to use vial (20 doses)	Thursday, 1 January 1987
Priorix	Measles, Mumps and Rubella – Lyophilised active component to be reconstituted with excipient diluent before use vial (1 dose)	Friday, 9 March 2001
Rotarix	Rotavirus – Liquid: ready to use plastic tube (1 dose)	Thursday, 12 March 2009
Rotarix	Rotavirus – Liquid: ready to use applicator (1 dose)	Thursday, 12 March 2009
Cervarix	Human Papillomavirus (Bivalent) – Liquid: ready to use vial (1 dose)	Wednesday, 8 July 2009
Cervarix	Human Papillomavirus (Bivalent) – Liquid: ready to use vial (2 dose)	Wednesday, 8 July 2009
Polio Sabin Mono T1	Polio Vaccine – Oral (OPV) Monovalent Type 1 – Liquid: ready to use vial (10 dose)	Thursday, 29 October 2009
Polio Sabin Mono T1	Polio Vaccine – Oral (OPV) Monovalent Type 1 – Liquid: ready to use vial (20 dose)	Thursday, 29 October 2009
Polio Sabin One and Three	Polio Vaccine - Oral (OPV) Bivalent Types 1 and 3 - Liquid: ready to use vial (10 doses)	Thursday, 29 October 2009
Polio Sabin One and Three	Polio Vaccine - Oral (OPV) Bivalent Types 1 and 3 - Liquid: ready to use vial (20 doses)	Thursday, 29 October 2009
Synflorix	Pneumococcal (conjugate) – Liquid: ready to use vial (1 dose)	Friday, 30 October 2009
Synflorix	Pneumococcal (conjugate) – Liquid: ready to use vial (2 doses)	Friday, 19 March 2010
Poliorix	Polio Vaccine – Inactivated (IPV) – Liquid: ready to use vial (1 dose)	Thursday, 5 August 2010
Poliorix	Polio Vaccine – Inactivated (IPV) – Liquid: ready to use vial (2 dose)	Thursday, 5 August 2010
Polio Sabin Mono Three (oral)	Polio Vaccine - Oral (OPV) Monovalent Type 3 - Liquid: ready to use vial (10 doses)	Tuesday, 5 October 2010
Polio Sabin Mono Three (oral)	Polio Vaccine - Oral (OPV) Monovalent Type 3 - Liquid: ready to use vial (20 doses)	Tuesday, 5 October 2010
Polio Sabin Mono Two (oral)	Polio Vaccine – Oral (OPV) Monovalent Type 2 – Liquid: ready to use vial (20 doses)	Wednesday, 11 May 2011
Polio Sabin Mono Two (oral)	Polio Vaccine – Oral (OPV) Monovalent Type 2 – Liquid: ready to use vial (10 doses)	Wednesday, 11 May 2011
Priorix	Measles, Mumps and Rubella – Lyophilised active component to be reconstituted with excipient diluent before use vial (2 doses)	Wednesday, 21 December 2011
Havrix 1440 Adult	Hepatitis A (Human Diploid Cell), Inactivated (Adult) – Liquid: ready to use vial (1 dose)	Friday, 19 July 2013
Havrix 720 Junior	Hepatitis A (Human Diploid Cell), Inactivated (Paediatric) – Liquid: ready to use vial (1 dose)	Friday, 19 July 2013
Boostrix	Diphtheria-Tetanus-Pertussis (acellular) – Liquid: ready to use vial (1 dose)	Tuesday, 9 July 2013
Menveo	Meningococcal ACYW-135 (conjugate vaccine) – Lyophilised active component to be reconstituted with liquid active component before use. Two vial set (1 dose)	Wednesday, 31 July 2013
Synflorix	Pneumococcal (conjugate) – Liquid: ready to use vial (4 doses)	Monday, 16 October 2017
Rotarix	Rotavirus – Liquid: ready to use plastic tube (5 dose)	Thursday, 14 February 2019

Zanamivir	Influenza – GSK – IN007 (a)	22 September 2009

SASB index

We have produced our first Sustainability Accounting Standards Board (SASB) index to illustrate how our reporting aligns with the Biotechnology and Pharmaceutical Industry guidelines. We will continue to align our reporting to SASB in future reports.

Data and information is reported via a range of sources including our public policies, the 2020 Annual Report, this 2020 ESG Performance Summary and on gsk.com. This Index signposts to the relevant source.

SASB index

SASB indicator		Where to find the information
Safety of clinical trial par	rticipants	
HC-BP-210a.1	Discussion, by world region, of management process for ensuring quality and patient safety during clinical trials	+ Clinical trials policy
HC-BP-210a.2	Number of FDA Sponsor Inspections related to clinical trial management and pharmacovigilance that resulted in: (1) Voluntary Action Indicated (VAI) and (2) Official Action Indicated (OAI)	Not reported
HC-BP-210a.3	Total amount of monetary losses as a result of legal proceedings associated with clinical trials in developing countries	Not reported
Access to medicines		
HC-BP-240a.1	Description of actions and initiatives to promote access to health care products for priority diseases and in priority countries as defined by the Access to Medicine Index	① p.35-36 Annual Report
HC-BP-240a.2	List of products on the WHO List of Prequalified Medicinal Products as part of its Prequalification of Medicines Programme (PQP)	① p.15-16 of this document
Affordabilty & pricing		
HC-BP-240b.1	Number of settlements of Abbreviated New Drug Application (ANDA) litigation that involved payments and/or provisions to delay bringing an authorized generic product to market for a defined time period	Not reported
HC-BP-240b.2	Percentage change in: (1) average list price and (2) average net price across US product portfolio compared to previous year	① p.2 of this document
HC-BP-240b.3	Percentage change in: (1) list price and (2) net price of product with largest increase compared to previous year	① p.2 of this document
Drug safety		
HC-BP-250a.1	List of products listed in the Food and Drug Administration's (FDA) MedWatch Safety Alerts for Human Medical Products database	Available via FDA Adverse Event Reporting website
HC-BP-250a.2	Number of fatalities associated with products as reported in the FDA Adverse Event Reporting System	Available via FDA Adverse Event Reporting website
HC-BP-250a.3	Number of FDA recalls issued, total units recalled	p.10 of this document
HC-BP-250a.4	Total amount of product accepted for takeback, reuse, or disposal	Not reported
HC-BP-250a.5	Number of FDA enforcement actions taken in response to violations of current Good Manufacturing Practices (cGMP), by type	p.10 of this document

Sustainability disclosure topics & accounting metrics continued

Counterfeit drugs		
HC-BP-260a.1	Description of methods and technologies used to maintain traceability of products throughout the supply chain and prevent counterfeiting	p.39 Annual Report Falsified and substandard healthcare products
HC-BP-260a.2	Discussion of process for alerting customers and business partners of potential or known risks associated with counterfeit products	p.39 Annual Report
HC-BP-260a.3	Number of actions that led to raids, seizure, arrests, and/or filing of criminal charges related to counterfeit products	Not reported
Ethical marketing		
HC-BP-270a.1	Total amount of monetary losses as a result of legal proceedings associated with false marketing claims	Not reported
HC-BP-270a.2	Description of code of ethics governing promotion of off-label use of products	Marketing practices and scientific engagement
Employee recruitment, de	evelopment & retention	
HC-BP-330a.1	Discussion of talent recruitment and retention efforts for scientists and research and development personnel	p.38 Annual Report
HC-BP-330a.2	(1) Voluntary and (2) involuntary turnover rate for: (a) executives/senior managers, (b) mid-level managers, (c) professionals, and (d) all others	We report turnover by gender on p.4 of this report
Supply chain managemer	nt en	
HC-BP-430a.1	Percentage of (1) entity's facilities and (2) Tier I suppliers' facilities participating in the Rx-360 International Pharmaceutical Supply Chain Consortium audit program or equivalent third-party audit programs for integrity of supply chain and ingredients	GSK is a member of Rx 360 and also conducts audits of third parties.
Business ethics		
HC-BP-510a.1	Total amount of monetary losses as a result of legal proceedings associated with corruption and bribery	Not reported
HC-BP-510a.2	Description of code of ethics governing interactions with health care professionals	Code of Practice for promotion of prescription medicines and for scientific engagement
Activity metrics		
HC-BP-000.A	Number of patients treated	p.35-36 Annual Report (patients reached through our access strategies)
HC-BP-000.B	Number of drugs (1) in portfolio and (2) in research and development (Phases 1-3)	+ p.26 Annual Report (pipeline)+ See online for products

United Nations Global Compact

GSK is a signatory to the UN Global Compact (UNGC). The Compact challenges business to operate according to ten principles covering bribery and corruption, human rights, labour and the environment. The following index is structured according to the 21 criterion for an Advanced Level Communication on Progress (COP) and is compiled from our 2020 Annual Report and the gsk.com website.

Statement of support from the CEO

"GSK remains committed to upholding the UNGC's Ten Principles on human rights, the environment and anti-corruption. We aim to do this through embedding our policies and standards across our business and remaining true to our values and our purpose: to help people do more, feel better, live longer."

Chama Walm Rey.

Emma Walmsley Chief Executive Officer March 2021

¹ The inclusion of this standard is necessitated on GSK publishing a breakdown of its Scope 3 GHG emissions. This was not done in the 2018 ESG performance summary.

Independent Limited Assurance Report

to the Directors of GlaxoSmithKline plc

GlaxoSmithKline plc ("GSK") commissioned DNV GL Business Assurance Services UK Limited ("DNV", "us" or "we") to conduct a limited assurance engagement over Selected Information presented in the ESG Performance Summary 2020 (the "Report"), for the year ended 31 December 2020.

Our Conclusion

Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the Selected Information is not fairly stated and has not been prepared, in all material respects, in accordance with the Criteria.

This conclusion relates only to the Selected Information, and is to be read in the context of this Independent Limited Assurance Report, in particular the inherent limitations explained overleaf.

Our competence, independence and quality control

DNV's established policies and procedures are designed to ensure that DNV, its personnel and, where applicable, others are subject to independence requirements (including personnel of other entities of DNV) and maintain independence where required by relevant ethical requirements. This engagement work was carried out by an independent team of sustainability assurance professionals. DNV holds other audit and assurance contracts with GSK, none of which conflict with the scope of this work. Our multidisciplinary team consisted of professionals with a combination of environmental and sustainability assurance experience.

Our Observations

Our observations and areas for improvement will be raised in a separate report to GSK's Management. Selected observations are provided below. These observations do not affect Our Conclusion made in the left hand column.

- GSK significantly increased the proportion of renewable electricity purchased from 5% in 2019 to 52% in 2020. We found that the process for tracking which sites purchase renewable electricity and the evidence to support this could be improved. We recommend that responsibility for this is assigned to one individual or team who can track progress and maintain evidence of renewable energy purchases for all GSK sites.
- GSK acquired a portfolio of sites in August 2019 and these were duly integrated into their environmental performance reporting. However, we found that none of these new sites had completed the GSK Water Stewardship Risk Assessment used to determine if a site is deemed "high risk" against a number of categories including water availability and local regulatory frameworks. We recommend that GSK considers implementing a process whereby any new sites are assessed against GSK's Water Stewardship Risk Assessment within a year of joining GSK.
- GSK can improve their market-based greenhouse gas (GHG) emissions reporting against the Greenhouse Gas Protocol's Scope 2 Guidance by establishing a robust procedure for collating market-based emission factors from all sites and applying residual emission factors where market-based emission factors are unavailable.
- Stakeholders rely on GSK's EHS performance data. To further demonstrate the robustness of their reporting, GSK may wish to consider expanding the scope of their assurance in future reporting cycles to include additional or alternative indicators, or performance against targets.

Selected Information

The scope and boundary of our work is restricted to the following Environmental, Health and Safety (EHS) performance data included within the Report (the "Selected Information") for the reporting year 2020:

- Total Energy (GWh)
- Purchased Renewable Electricity (GWh)
- Total Scope 1 GHG emissions (thousands of tonnes CO₂e)
- Total Scope 2 GHG emissions location-based (thousands of tonnes CO₂e)
- Total Scope 2 GHG emissions market-based (thousands of tonnes CO₂e)
- Selected Scope 3 GHG emissions from Emissions from use of propellant based inhalers by patients (thousands of tonnes CO₂e)
- Total water use (million m³)
- Total wastewater discharged (million m³)
- Water use at high water risk sites (million m³)

- Total beneficial use waste (thousand tonnes)
- Total non-beneficial use waste (thousand tonnes)
- Total overall waste (thousand tonnes)
- Total waste to landfill (thousand tonnes)
- Number of fatalities (employees and complementary workers under GSK direct supervision)
- Reportable incidents with lost time
- Lost time reportable injury and illness rate (per 100,000 hours worked)
- Reportable incidents with and without lost time
- Reportable injury and illness rate (per 100,000 hours worked)

To assess the Selected Information, which includes an assessment of the risk of material misstatement in the Report, we have used GSK's EHS Technical Support Documents (the "Criteria"), a summary can be found on pages 11, 12 and 13 of the Report.

We have not performed any work, and do not express any conclusion, on any other information that may be published in the Report or on GSK's website for the current reporting period or for previous periods.

Standard and level of assurance

We performed a limited assurance engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000 revised – 'Assurance Engagements other than Audits and Reviews of Historical Financial Information' (revised), issued by the International Auditing and Assurance Standards Board. This standard requires that we comply with ethical requirements and plan and perform the assurance engagement to obtain limited assurance.

DNV applies its own management standards and compliance policies for quality control, in accordance with ISO/IEC 17021:2015 - Conformity Assessment Requirements for bodies providing audit and certification of management systems, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement; and the level of assurance obtained is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed. We planned and performed our work to obtain the evidence we considered sufficient to provide a basis for Our Conclusion, so that the risk of this conclusion being in error is reduced but not reduced to very low.

Basis of Our Conclusion

We are required to plan and perform our work in order to consider the risk of material misstatement of the Selected Information; our work included, but was not restricted to:

- Assessing the appropriateness of the Criteria for the Selected Information;
- Conducting interviews with GSK's Management to obtain an understanding of the key processes, systems and controls in place to generate, aggregate
 and report the Selected Information;
- Desktop review of evidence of site level data and following this through to consolidated group data;
- Remote site visits to Dresden (Germany), Nyon (Switzerland) and Ware GMS (UK) to review process and systems for preparing site level data consolidated at GSK's Ware R&D (UK) site. DNV were free to choose the sites on the basis of materiality and their contribution to the group's overall data;
- Performing limited substantive testing on a selective basis of the Selected Information to check that data had been appropriately measured, recorded, collated and reported;
- Recalculating the Selected Information using suitable conversion factors and/or as established by GSK's Criteria;
- Reviewing information provided by GSK's third party contractors;
- Reviewing that the evidence, measurements and the scope provided to us by GSK for the Selected Information is prepared in line with the Criteria; and
- Reading the Report and narrative accompanying the Selected Information within it with regard to the Criteria.

DNV GL Business Assurance Services UK Limited

London, UK 9 March 2021

Inherent limitations

All assurance engagements are subject to inherent limitations as selective testing (sampling) may not detect errors, fraud or other irregularities. Non-financial data may be subject to greater inherent uncertainty than financial data, given the nature and methods used for calculating, estimating and determining such data. The selection of different, but acceptable, measurement techniques may result in different quantifications between different entities.

Our assurance relies on the premise that the data and information provided to us by GSK have been provided in good faith. DNV expressly disclaims any liability or co-responsibility for any decision a person or an entity may make based on this Assurance Statement.

Responsibilities of the Directors of GSK and DNV

The Directors of GSK have sole responsibility for:

- Preparing and presenting the Selected information in accordance with the Criteria;
- Designing, implementing and maintaining effective internal controls over the information and data, resulting in the preparation of the Selected Information that is free from material misstatements;
- Measuring and reporting the Selected Information based on their established Criteria; and
- Contents and statements contained within the Report and the Criteria.

Our responsibility is to plan and perform our work to obtain limited assurance about whether the Selected Information has been prepared in accordance with the Criteria and to report to GSK in the form of an Independent Limited Assurance Conclusion, based on the work performed and the evidence obtained. We have not been responsible for the preparation of the Report.

DNV Business Assurance

DNV GL Business Assurance Services UK Limited is part of DNV – Business Assurance, a global provider of certification, verification, assessment and training services, helping customers to build sustainable business performance. www.dnvgl.co.uk/BetterAssurance

Public policies available online

Please see our <u>public policy page</u> for our positions on a number of issues including:

- Anti-microbial resistance
- Care, welfare and treatment of animals
- Clinical trials in the developing world
- Cloning and Stem cell technologies
- Code of conduct
- Deforestation free sourcing
- Impact of climate change on health
- Genetically modified micro-organisms and Environment, Health and Safety (EHS)
- Marketing practices and scientific engagement
- Nanotechnology
- Ozone depletion and metered-dose inhalers for asthma
- Pharmaceuticals in the environment (PiE)
- Pharmacovigilance
- Tax strategy
- Working with third parties

On gsk.com we provide more information on a number of topics including:

- Materiality assessment
- Human rights
- Sustainable Development Goals
- Political advocacy
- Patient group funding
- <u>Trade association memberships</u>
- Charitable grant contributions
- Criteria for working with Public Policy Groups
- Modern Slavery Act Statement
- Preparing for future disease threats

Cautionary statement

This document may contain forward-looking statements. Forward-looking statements give the Group's current expectations or forecasts of future events. An investor can identify these statements by the fact that they do not relate strictly to historical or current facts. They use words such as 'anticipate', 'estimate', 'expect', 'intend', 'will', 'project', 'plan', 'believe', 'target' and other words and terms of similar meaning in connection with any discussion of future operating or financial performance. In particular, these include statements relating to future actions, prospective products or product approvals, future performance or results of current and anticipated products, sales efforts, expenses, the outcome of contingencies such as legal proceedings, dividend payments and financial results. Other than in accordance with its legal or regulatory obligations (including under the Market Abuse Regulations, UK Listing Rules and the Disclosure Guidance and Transparency Rules of the Financial Conduct

Authority), the Group undertakes no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise. Investors should, however, consult any additional disclosures that the Group may make in any documents which it publishes and/or files with the US Securities and Exchange Commission (SEC). All investors, wherever located, should take note of these disclosures. Accordingly, no assurance can be given that any particular expectation will be met and investors are cautioned not to place undue reliance on the forward-looking statements. Forward-looking statements are subject to assumptions, inherent risks and uncertainties, many of which relate to factors that are beyond the Group's control or precise estimate. The Group cautions investors that a number of important factors, including those in this presentation, could cause actual results to differ materially from those expressed or implied in any forward-looking statement.
