SmithKline Beecham Senior Executive Pension Plan (“the Plan”)

Statement of Investment Principles for the Defined Benefit and Defined Benefit AVCs of the SmithKline Beecham Senior Executive Pension Plan

This Statement of Investment Principles (SIP) covers the Defined Benefit section of the Scheme and a section on the Defined Benefit AVC holdings of the Plan. The Trustee notes that there are differing policies between the Defined Benefit Section and DB AVC holdings of the Plan and as a result the Trustee has decided to separate this SIP into two different sections in order to detail the specific policies for each of the arrangements. The order in which the relevant section is covered in the SIP is provided below:

- Section 1. Defined Benefit Section
- Section 2. DB AVC holdings of the Plan

For the purposes of regulatory requirements and for the avoidance of doubt, this document should be treated as a single document that details the policies for both arrangements.

Dated: 31 March 2020
SmithKline Beecham Senior Executive Pension Plan ("the Plan")
Statement of Investment Principles for Defined Benefits

This section of the Statement of Investment Principles (SIP) covers the defined benefits of the Plan. It is set out in three parts:

1) Governance arrangements
2) Objectives and implementation
3) The Trustee’s investment policies.

For convenience, the Plan’s Statement of Investment Principles has been split into two documents. This document covers the Defined Benefit Section and there is a separate document covering the AVCs.

The Plan’s investment arrangements are set out in this SIP. This SIP has been prepared after obtaining written professional advice from Cardano Risk Management Limited (the "Investment Adviser") which is regulated by the Financial Conduct Authority ("FCA"). The Trustee believes that the Investment Adviser meets the requirements of Section 35 (5) of the Pensions Act 1995. The Trustee has also consulted with GSK (the "Principal Employer") in forming this document.

The Plan is governed by its Trust Deed and Rules which sets out all of the benefits in detail and specifies the Trustee’s investment powers. The investment powers do not conflict with the SIP.

1. Governance Section (Defined Benefit Section)

The Trustee is responsible for the investment of the Plan assets. The Trustee takes some decisions itself and delegates others (either directly or indirectly) to the Joint Audit, Risk & Operations Committee (JAROC) or to external parties such as Investment Advisors or Fund Managers.

When deciding which decisions to take itself and which to delegate, the Trustee has taken into account whether it has the appropriate training and expert advice in order to make an informed decision, as well as the Trustee’s ability to effectively execute the decision. The Trustee has established the following decision making structure.

<table>
<thead>
<tr>
<th>Trustee</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Set structures and processes for carrying out its role.</td>
</tr>
<tr>
<td>• Determine targeted allocation strategy between return seeking and liability matching assets.</td>
</tr>
<tr>
<td>• Determine (with assistance as required) the investment strategy, hedging strategy and insurance solutions.</td>
</tr>
<tr>
<td>• Select the AVC investment options.</td>
</tr>
<tr>
<td>• Select and monitor investment advisers.</td>
</tr>
<tr>
<td>• Maintain an Investment and Hedging Strategy (IHS) document.</td>
</tr>
<tr>
<td>• Set structures for implementing the IHS and make day to day decisions relevant to the operation of the IHS.</td>
</tr>
<tr>
<td>• Annually update the IHS to capture any changes that have occurred in the preceding 12 months.</td>
</tr>
<tr>
<td>• Require the fund managers to operate within the terms of this statement so far as practical.</td>
</tr>
<tr>
<td>• Consult the Joint Investment Committee (JIC) for any investment input desired</td>
</tr>
</tbody>

2. Objectives, Strategy and Implementation (Defined Benefit Section)

2.1 Investment Objective

The Trustee aims to invest the assets of the Plan prudently to ensure that the benefits promised to members are provided. In setting the planned investment strategy, the Trustee first considered the lowest risk asset allocation that it could adopt in relation to the Plan’s liabilities. The asset allocation strategy that it has selected (the planned asset allocation strategy) consists primarily of an insurance solution (a ‘Buy-in policy’), designed to meet the benefits of the majority of members as they fall due.

2.2 Strategy

The planned asset allocation strategy was determined with regard to the liability profile and funding position of the Plan. The Trustee considered written advice from its investment advisers when choosing the Plan’s planned asset allocation strategy. The Trustee monitors the planned asset allocation strategy on an ongoing basis.

2.3 Risk Measurement and Management

The Trustee recognises that the key risk to the Plan is that it has insufficient assets to make provisions for 100% of its liabilities ("funding risk"). The Trustee has identified a number of risks which have the potential to cause deterioration in the Plan’s funding level and therefore contribute to funding risk. These risks are discussed in this section.

2.4 Risks Managed by the Trustee

The risks identified by the Trustee are as follows:

- The risk of a significant difference in the sensitivity of asset and liability values to changes in financial and demographic factors ("mismatching risk"). The Trustee and its advisers considered this mismatching risk when agreeing the investment strategy.
- The possibility of failure of the Plan’s sponsoring employer ("covenant risk"). The Trustee and its advisers considered this risk when agreeing investment strategy and consulted with the sponsoring employer as to the suitability of the investment strategy.
- Investment related risks (such as non-diversification risk, asset misallocation risk, manager risk, custody risk, stocklending risk, and cash investment risk as well as the risk attaching to a failure to adequately monitor environmental, social and governance ("ESG") considerations or other financially material considerations, which may have an adverse effect on the performance of the assets over the relevant lifespan of the Plan); and

</tbody>
</table>
• hedging related risks (such as counterparty risk, roll risk, hedge ineffectiveness risk, and collateral shortfall risk), and liquidity risk.

The Trustee considers these risks to be well managed, by virtue of the Buy-in policy which requires the insurer to meet the majority of benefit payments as they fall due.

2.5 Management of Operational Risk

A further risk that the Trustee has identified is the risk of fraud, poor advice or acts of negligence (“operational risk”). The Trustee have sought to minimise such risk by ensuring that all advisers and third party service providers are suitably qualified and experienced and that suitable liability and compensation clauses are included in all contracts for professional services received.

In addition, the JAROC have responsibility for reviewing the ongoing operation of and risks associated with the Buy-in policy, including but not limited to the Insurer's ongoing credit quality and the timeliness and accuracy of payments.

2.6 Regular Monitoring of Risks

The Trustee manages risks using both qualitative and quantitative techniques.

Due to the complex and interrelated nature of the risks that the Trustee manages, these risks are considered in a qualitative rather than quantitative manner as part of each formal investment strategy review (normally triennially).

The Trustee may also review the risks directly managed by it quantitatively. For example, the Trustee regularly reviews the progress of the Plan’s funding level over time as part of its ongoing management of mismatching risk.

In addition, the trustees monitor:

• Performance versus the Plan investment objective
• Performance of individual fund managers versus their respective targets.
• Any significant issues with the fund managers that may impact their ability to meet their performance targets.

2.7 Implementation

The Trustee invests DB Section assets directly, primarily via a Buy-in policy.

3. Investment Policies (Defined Benefit Section)

3.1 General Investment Policy (including ESG and Stewardship)

The Trustee of the Plan will, after having taken investment advice, decide an overall planned asset allocation for the Plan. The IHS is then developed which considers:

• The underlying schemes’ chosen overall asset allocation.
• A full range of asset classes, including alternative asset classes such as private equity.
• The suitability of each asset class in the planned asset allocation strategy.
• The risks and rewards of a range of different asset allocation strategies.
• The suitability of the possible styles of investment management and manager diversification.
• The need for appropriate diversification both across asset classes and within asset classes.
• The viability of including risk mitigation strategies, for example by seeking to protect against equity falls using floors or other hedging mechanisms.

Having considered the above and taken advice from the investment advisers, the trustees will consider the proposed asset allocation strategy for the Plan. It has been agreed that all of the Plan’s assets will be liability matching in nature, with the majority being held in the form of a Buy-in policy.

The Trustee expect (where used) the fund managers to manage the assets delegated to them under the terms of their respective contracts and to give effect to the principles in this statement so far as is reasonably practical. In addition, fund managers pay commissions to third parties on many trades they undertake in the management of the assets.

The Trustee has a long term time horizon for its investments and therefore acknowledges the importance of being an engaged and responsible long-term investor in the assets and markets in which it invests. The Trustee considers sustainable investment to be the integration of environmental, social and governance (“ESG”) factors into investment decisions, where financial risk and/or return is or could be materially affected (“Sustainable Investment”).

However, as the majority of the Plan’s assets are in the form of a Buy-in policy, the Trustee recognises that it is not possible to specify investment restrictions on these assets.

To the extent investment managers are selected, retained or realised for the residual liability matching assets, the Trustee expects their managers to take into account Sustainable Investment considerations (including but not limited to climate change) when making investment decisions.

The Trustee keeps up to date on developments in Sustainable Investment through periodic training and discussions.

**Stewardship**

Whilst the Trustee does not wish to interfere with the day to day investment decisions of its investment managers, where managers have voting rights and can be impactful the Trustee evaluates each investment manager’s approach on an annual basis and the Trustee expects its investment managers to comply with the principles outlined in the Principles for Responsible Investing and the UK Stewardship Code. The Trustee’s Investment Consultant has regular dialogue on this topic with investment managers and reports on this to the Trustee no less than annually.

The Trustee supports the principle of good corporate governance and shareholder activism and, for relevant mandates, prefers its investment managers to have an explicit strategy, outlining the circumstances in which they will engage with a company (or issuer of debt, if applicable) on relevant matters (including performance, strategy, risks, social and environmental impact and corporate governance) and how they will measure the effectiveness of this strategy. The Trustee reviews regularly the voting strategy of its investment managers.

As the majority of the Plan’s assets are in the form of a Buy-in policy, the Trustee does not take the views of the members and beneficiaries, including (but not limited to) their views in relation to Sustainable Investment into account when setting the Defined Benefit investment strategy.
3.2 Additional Voluntary Contributions (AVCs)

The Trustee has made available various investment vehicles for the investment of AVCs. The details of the policies surrounding these arrangements are set out in the Statement of Investment Principles for the DB AVCs Section.

3.3 Direct Investments

The Pensions Act 1995 distinguishes between investments where the management is delegated to a fund manager under a written contract and those where a product is purchased directly, e.g. the purchase of an insurance policy or units in a pooled vehicle. The latter are known as direct investments.

The Trustee approaches Sustainable Investment and ESG considerations where applicable in direct investments consistently with their general policies outlined above.

The Trustee’s policy is to review its direct investments and to obtain written advice about them at regular intervals. These include the vehicles available for members’ AVCs. When deciding whether or not to make any new direct investments the Trustee will obtain written advice and consider whether future decisions about those investments should be delegated to the fund manager(s).

The written advice will consider the issues set out in the Occupational Pension Schemes (Investment) Regulations 2005 and the principles contained in this statement. The regulations require all investments to be considered by the Trustee (or, to the extent delegated, by the fund managers) against the following criteria:

- The best interests of the members and beneficiaries
- Security
- Quality
- Liquidity
- Profitability
- Nature and duration of liabilities
- Tradability on regulated markets
- Diversification
- Use of derivatives

The policy for the Plan’s AVC assets which are classified as direct investments are set out in the Statement of Investment Principles for the DB AVCs.

4. Supplementary information to the SIP

There is further information contained in the document titled “SmithKline Beecham Senior Executive Pension Plan ("the Plan") Supplementary information to the Statement of Investment Principles” on the fee structures for Managers and Advisers. In addition, details of the policies governing AVC arrangements are set out in the Statement of Investment Principles for the DB AVCs.

5. Compliance with this statement

The Trustee will review this SIP at least every 3 years and as soon as practicable following a significant change in investment strategy. The Trustee will take investment advice and consult with the Employer over any changes to the SIP.
Dated: 31 March 2020

SmithKline Beecham Senior Executive Pension Plan ("the Plan")
Statement of Investment Principles for the DB AVCs

This Statement of Investment Principles (SIP) covers the AVC holdings of the Defined Benefit (DB) Section of the Plan. It is set out in three parts:

1) Governance arrangements
2) Objectives and implementation of the DB AVC holdings of the Plan
3) The Trustee’s investment policies

The Plan’s investment arrangements with respect to the DB AVC holdings are set out in this SIP. There is a separate section covering the main Defined Benefit Section of the Scheme. This section of the SIP has been prepared after obtaining written professional advice from Mercer Limited (the “Investment Adviser”) which is regulated by the Financial Conduct Authority ("FCA"). The Trustee believes that the Investment Adviser meets the requirements of Section 35 (5) of the Pensions Act 1995. The Trustee has also consulted with GSK (the “Principal Employer”) in forming this document.

The Plan is governed by its Trust Deed and Rules which sets out all of the benefits in detail and specifies the Trustee’s investment powers. The investment powers do not conflict with the SIP. This section of the SIP is also designed to fulfil the key objectives of the DC Code of Practice.

The Trustee believes that the Plan’s investment policies and their implementation are in keeping with best practice, including the principles underlying the Pensions Regulator’s DC Code of Practice No 13.

1. Governance Section (DB AVCs)

The Trustee is responsible for the investment of the Plan assets. The Trustee takes some decisions itself and delegates others (either directly or indirectly) to the Joint Investment Committee (JIC), the Joint Audit, Risk & Operations Committee (JAROC) the Joint DC Committee (JDCC) or to external parties such as Investment Advisors or fund Managers.

When deciding which decisions to take itself and which to delegate, the Trustee has taken into account whether it has the appropriate training and expert advice in order to make an informed decision as well as the Trustee’s ability to effectively execute the decision. The Trustee has established the following decision making structure.
Trustee
- Set structures and processes for carrying out its role.
- Determine (with assistance as required) the investment strategy
- Monitor the JDCC and consider proposals made by the JDCC.
- Select and monitor fund managers of the DC and AVC assets.
- Select the DC and AVC investment options.
- Select and monitor investment advisers.

Joint DC Committee
- Review all aspects of the Scheme that relate directly to the AVC and DC arrangements, including investments, risk monitoring, education and operations.
- Aid in the selection and monitoring of the investment advisers and fund managers for the pension schemes AVC and DC assets
- Assist the Trustee with setting the asset allocation of funds.
- Require the fund managers to operate within the terms of this statement so far as practical.

Investment Advisers
- Advise on all aspects of the investment of the Scheme assets, including implementation.
- Advise on this statement.
- Provide required training.
- Advise the Trustee on suitability of the benchmarks used.
- Provide assistance to the Trustee and JDCC in meeting their objectives

Fund Managers
- Operate within the terms of this statement and their written contracts.
- Select the individual investments within their portfolios (e.g. individual stocks, bonds, derivatives, repos, etc. as applicable) with regard to their suitability, including consideration of the impact on portfolio diversification.

2. Objectives, Strategy and Implementation (DB AVCs)

The JDCC recognises that members holding DB AVCs have differing investment needs, that these may change during the course of their working lives, and that they may have differing attitudes to risk.

The JDCC regards its primary objective as making available a range of investment funds which enable members to tailor the strategy for their assets to their own needs. The JDCC believes that members should generally make their own investment decisions based on their individual circumstances. The JDCC also recognises that members may not believe themselves qualified to take investment decisions.

2.1 Investment Objectives

In investing the assets of the Plan in a prudent manner, the Trustee’s objectives are as follows:
- To provide an appropriate range of pooled investment funds that are intended to meet the varying investment needs and risk tolerances of members so it may satisfy the reasonable risk/return combinations appropriate for most Plan members.
- To select appropriate investment managers, unitised funds and/or insurance companies to manage each of the investment options.
- To inform members about their investment options, particularly in relation to the potential risks and rewards of each option.
- To monitor and take advice on the suitability of the investment options provided.
- To take appropriate advice from the Trustee’s investment and legal advisers in order to
make informed decisions.

- To act in the interests of the Plan’s membership as a whole.

2.2 Investment Strategy

The JDCC is responsible for reviewing all aspects of the Plan that relate directly to the DC arrangements (in which members DB AVCs are invested), including investments, risk monitoring, education and operations. Following such review, the JDCC may take action for the efficient and effective operation of the DC arrangements, although ultimately it has no power, except where this has been delegated by the Trustee from time to time.

The Investment Objectives for the DB AVCs are implemented using a range of investment options including equity, diversified growth, bond and cash funds. Both active and passive management options are offered to members, depending on the asset class. The main lifecycle strategy targets the purchase of an inflation-linked annuity at retirement and automatically switches members’ funds from growth assets, such as global equity and diversified growth assets into bonds and cash in the period prior to retirement. This is broadly designed to maintain the purchasing power of a member’s pot relative to annuity prices and allow them to take 25% of their pot tax-free. Two alternative lifecycles for members targeting income drawdown and cash lump sums at retirement are also available.

The Trustee aims to make available a range of options which satisfy the needs of the majority of members and in doing so attempt to find an appropriate balance in the range and kind of investments offered to members to offer flexibility and choice, as well as simplicity and cost control.

The structures of all of the lifecycle options were chosen to try to deliver high levels of investment returns in the long-term while providing some protection against changes in the amount of members’ benefits as they approach retirement.

It is the Trustee’s policy to provide suitable information for members so that they can make the appropriate investment decisions. The range of funds was chosen by the Trustee after taking advice from the Trustee’s investment advisers.

The Trustee periodically reviews the suitability of the options provided and from time to time will change or introduce additional investment funds as appropriate. Day-to-day management of the assets is delegated to professional investment managers via an investment platform.

Benefits for members with DB AVC holdings are determined by the value of members’ individual accounts at retirement. The members’ retirement benefits depend on:

- The level of contributions made by the member or made on the member’s behalf, including prior transfer values from other arrangements (if applicable);
- Investment returns achieved (net of fees); and
- Where applicable, annuity terms prevailing at the time of the member’s retirement.

The Trustee has a reasonable expectation that the long-term return on the investment options that invest predominantly in equities should exceed price inflation and general salary growth. The long-term expected return on diversified growth assets is to achieve equity-like returns, with less volatility than equities. The long-term returns on the bond and cash options are expected to be lower than those on the predominantly equity options. However, bond funds are expected to help reduce volatility in relation to the price of annuities, giving some protection in the amount of secured
pension for members closer to retirement. Clearly bonds will not provide a hedge against changes in the demographic assumptions insurers use to price annuity contracts. Cash funds are expected to provide protection against changes in short-term capital values, and may be appropriate for members receiving part of their retirement benefits in the form of tax-free cash.

2.3 Risk Measurement and Management

The Trustee regards “risk” as the likelihood of failing to achieve the objectives and policies detailed above and seeks to minimise these risks, in so far as is possible. The Trustee recognises the key risk is that members will have insufficient savings for retirement or savings that do not meet their expectations. The Trustee considered this risk when setting the investment options and strategy for the Plan. The Trustee’s policy in respect of risk measurement methods and risk management processes is set out in this section of the SIP.

The Trustee has considered risk from a number of perspectives in relation the DB AVCs. The list below is not exhaustive, but covers the main risks considered by the Trustee to be financially material in formulating the policy regarding offerings to members.

<table>
<thead>
<tr>
<th>Type of Risk</th>
<th>Risk</th>
<th>Description</th>
<th>How is the risk monitored and managed?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Inflation risk</td>
<td>The risk that returns over the members’ working lives do not keep pace with inflation.</td>
<td>The Trustee makes available a range of funds, across various asset classes, with the majority expected to keep pace with inflation over the long term. Members are able to set their own investment allocations, in line with their risk tolerances.</td>
</tr>
<tr>
<td></td>
<td>Currency risk</td>
<td>The risk that fluctuations in foreign exchange rates will cause the value of overseas investments to fluctuate.</td>
<td>Within active funds, management of these market risks is delegated to the investment manager. The JDCC considers fund performance, including that of the main investment option, on a quarterly basis.</td>
</tr>
<tr>
<td>Market risks</td>
<td>Credit risk</td>
<td>The risk that the issuer of a financial asset, such as a bond, fails to make the contractual payments due.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Equity, property and other price risk</td>
<td>The risk that market movements leads to a substantial reduction in the value of member savings.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Capital</td>
<td>The risk that the monetary value of a member's account falls.</td>
<td>The Trustee’s objective is to provide investment options where the asset value is unlikely to fall except in abnormal market conditions. A Money Market fund is an example of such an option that is offered to members.</td>
</tr>
<tr>
<td></td>
<td>Liquidity risk</td>
<td>The risk that the Plan’s assets cannot be realised at short notice in line with member demand.</td>
<td>The Plan is invested in daily dealt and daily priced pooled funds via an insurance policy with Legal &amp; General. Investment managers are expected to manage the liquidity of assets in the underlying strategies and keep exposures to any illiquid assets to prudent levels.</td>
</tr>
<tr>
<td>Type of Risk</td>
<td>Risk</td>
<td>Description</td>
<td>How is the risk monitored and managed?</td>
</tr>
<tr>
<td>-----------</td>
<td>----------------------------------------------------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td></td>
<td>Investment Manager risk</td>
<td>The risk that the appointed investment managers: do not meet their fund performance objectives, fail to carry out operational tasks, do not ensure safe-keeping of assets or breach agreed guidelines.</td>
<td>The Trustee considers fund returns relative to their respective benchmarks. This is monitored on a quarterly basis. The Trustee considers the Investment Advisor's rating of the investment managers on an ongoing basis and monitors the Plan's active funds against a robust framework.</td>
</tr>
<tr>
<td></td>
<td>Pension Conversion risk</td>
<td>The risks that the member is invested in a strategy that does not reflect the way in which they intend to take their benefits at retirement.</td>
<td>The Trustee makes available a lifestyle strategy for members. Lifestyle strategies automatically switch member assets into investments whose value is expected to be less volatile relative to how the member wishes to access their pension savings as they approach retirement age. Members can select a lifestyle strategy in accordance with their personal preferences and retirement objectives.</td>
</tr>
<tr>
<td></td>
<td>Environmental, Social and Corporate Governance (&quot;ESG&quot;) risk</td>
<td>The risk that ESG concerns, including climate change, have a financially material impact on the return of the Plan’s assets.</td>
<td>The management of this risk has been considered and investment managers are expected to integrate this into their processes. The Trustee regularly reviews the investment managers’ policies and actions in relation to this. The Trustee’s policy on Responsible Investment and Corporate Governance is set out in Section 3.1.</td>
</tr>
<tr>
<td></td>
<td>Operational risk</td>
<td>The risk of fraud, ineffective governance structure, poor advice or acts of negligence in the operation of the Plan.</td>
<td>The Trustee has sought to minimise such risk by ensuring that all advisers and third party service providers are suitably qualified and experienced and that suitable liability and compensation clauses are included in all contracts for professional services received. The Trustee reviews the Plan risk dashboard on a quarterly basis to ensure risks are identified and adequate controls are in place to ensure the effective running of the Plan, including areas such as the effectiveness of the committee, communications and adequate provisions in place with service providers as well as a number of the other risks previously listed.</td>
</tr>
</tbody>
</table>

The Trustee considers these risks to be applicable across the lifetime of a member’s time within the Plan.

Due to the complex and interrelated nature of these risks, the Trustee considers these risks in a qualitative rather than quantitative manner as part of each formal strategy review. Some aspects of these risks may be modelled explicitly.

In addition, the Trustee measures risk in terms of the performance of the assets compared to the benchmarks on a regular basis, usually quarterly, along with monitoring any significant issues with the fund managers that may impact their ability to meet the performance targets set by the Trustee.
The Trustee has established a risk register and monitors risks in accordance with this.

3. Investment Policies (DB AVCs)

3.1 General Investment Policy (including ESG and Stewardship)

The Trustee and JDCC expects the underlying fund managers to manage the assets under the terms of their respective contracts. In addition, fund managers pay commissions to third parties on many trades they undertake in the management of the assets.

For the DB AVCs, the fund range offered to members is accessed through a platform provided by Legal & General Assurance (Pensions Management) Limited (“L&G”). The Trustee accesses the platform via a long-term insurance contract with L&G. L&G operates within the terms of this Statement and the written contract. The Trustee reviews the liquidity of the funds offered to members to ensure that assets are readily realisable.

The Trustee believes that environmental, social and governance (ESG) factors may have a material impact on investment risk and return outcomes, and that good stewardship can create and preserve value for companies and markets as a whole. The Trustee also recognises that long-term sustainability issues, particularly climate change, present risks and opportunities that increasingly may require explicit consideration. The Trustee aims to be an engaged and responsible long-term investor in the assets and markets in which it invests directly or indirectly. The Trustee believes that the integration of ESG factors within Investment Managers’ investment processes may have the ability to have a positive impact on the risk and the sustainable long-term expected returns from the Plan’s investments.

The Trustee expects the underlying managers to evaluate ESG factors, including climate change considerations, exercising voting rights and stewardship obligations attached to investments, in accordance with their own corporate governance policies and current best practice, including the UK Corporate Governance Code and UK Stewardship Code. The Trustee does not wish to interfere with the day to day investment decisions of its investment managers. The Trustee reviews the compliance of managers against the UK Stewardship Code on an annual basis and engages with managers who are not aligned with best practice standards.

The Trustee supports the principle of good corporate governance and shareholder activism and, for relevant mandates, prefers its investment managers to have an explicit strategy, outlining the circumstances in which they will engage with a company (or issuer of debt, if applicable) on relevant matters (including performance, strategy, risks, social and environmental impact and corporate governance) and how they will measure the effectiveness of this strategy. The Trustee reviews the voting strategy of its investment managers annually.

The Trustee considers how ESG, climate change and stewardship is integrated within investment processes of new investment managers and monitoring of existing investment managers. Monitoring is undertaken on a regular basis through consideration of ESG ratings provided by the advisors as well as annual meetings and updates with investment managers.

These policies apply across the range of investment options made available to members including the main GSK Lifecycle investment option, the alternative GSK Lifecycle options and the self-select GSK investment fund range.
While the Trustee did not seek member views in forming their current approach to considerations around ESG, stewardship, climate change and non-financial matters within the Scheme’s investments, the Trustee will seek these views from time to time and will use these to inform decisions regarding the Trustee’s policy in the future. The Trustee will continue to review this policy regularly to ensure that the policy is appropriate for the Plan’s membership.

Assets are mainly invested on regulated markets. We note that some funds may have exposure to securities not on regulated markets. The Trustee expects that managers will monitor these and keep these to prudent levels.

The Trustee will review the entire SIP at least every three years and immediately following any significant change in investment policy. The Trustee will take investment advice and consult with the Sponsoring Employer over any changes to the SIP.

The Trustee has appointed investment advisers who operate under agreements to provide services which ensures the Trustee and JDCC are fully briefed to take decisions themselves and to monitor those they delegate.

The members can invest in a range of fund options. It is the Trustee’s policy to consider:

- The risks and rewards of a range of different asset allocation strategies.
- The suitability of each asset class in the lifecycle strategies.
- The suitability of the possible styles of investment management and the option of manager diversification for members.
- The need for appropriate diversification both across asset classes and within asset classes.
- The liquidity of the funds offered to members to ensure that assets are readily realisable.

3.2. Policy in Relation to the Main Lifecycle Investment Option

The GSK Lifecycle Pension Option is the main lifecycle investment option for the Plan. Over the years prior to retirement, this option de-risks to an asset allocation designed to be appropriate for a typical member who intends to access their benefits via an inflation linked pension at retirement.

Until June 2014, the main lifecycle investment option was the GSK Lifecycle (pre 2014). When the new GSK Lifecycle was implemented in June 2014, members with more than 10 years to their selected retirement date were moved to this new investment option, members with less than 10 years until their selected retirement date continue to be invested in the legacy GSK Lifecycle (pre 2014) investment option, unless they have made an alternative investment choice.

The GSK Lifecycle Pension option comprises of 75% GSK Global Equity Index Fund and 25% GSK Diversified Growth Fund until the member is 5 years from their Normal Retirement Date or their selected Target Retirement Date, in order to build up their account, this is known as the “growth phase”.

During the 5 years up to this date, the member’s account will gradually be switched to the GSK Inflation Linked Pre-Retirement and GSK Cash Funds (according to the table below), in order to protect the value of their account. This is known as the “pre-retirement phase”.

Page 13 of 23
Years to Retirement Date | GSK Lifecycle | GSK Inflation Linked Pre-Retirement Fund | GSK Cash Fund
---|---|---|---
5+ | 100% | 0% | 0%
4 | 80% | 20% | 0%
3 | 60% | 40% | 0%
2 | 40% | 52% | 8%
1 | 20% | 64% | 16%
0 | 0% | 75% | 25%

The GSK Lifecycle (pre 2014) comprises of 100% GSK Global Equity Index Fund until the member is 10 years from their Normal Retirement Date or their selected Target Retirement Date, in order to build up their account, this is known as the “growth phase”.

During the 10 years up to this date, the member’s account will gradually be switched to the GSK Inflation Linked Pre-Retirement and GSK Cash Funds (according to the table below), in order to protect the value of their account. This is known as the “pre-retirement phase”.

Years to Retirement Date | GSK Global Equity Index Fund | GSK Inflation Linked Pre-Retirement Fund | GSK Cash Fund
---|---|---|---
10+ | 100% | 0% | 0%
9 | 90% | 7.5% | 2.5%
8 | 80% | 15% | 5%
7 | 70% | 22.5% | 7.5%
6 | 60% | 30% | 10%
5 | 50% | 37.5% | 12.5%
4 | 40% | 45% | 15%
3 | 30% | 52.5% | 17.5%
2 | 20% | 60% | 20%
1 | 10% | 67.5% | 22.5%
0 | 0% | 75% | 25%

The aims of the main lifecycle and the legacy lifecycle investment options, and the ways in which the Trustee seeks to achieve these aims are detailed below:

- To generate returns in excess of inflation during the growth phase of the strategy whilst managing downside risk.

*The GSK Lifecycle’s growth phase invests in equities and other growth-seeking assets (through an absolute return/ diversified growth fund). These investments are expected to provide equity-like growth over the long term with some downside protection and some protection against inflation erosion. The growth phase of the GSK Lifecycle (pre 2014) invests in equities alone. These investments are expected to provide growth over the long term and some protection against inflation erosion. This investment strategy de-risks out of equities sooner, to account for the fact that equities can be subject to downside risk.*
• To provide a strategy that reduces investment risk for members as they approach retirement.

As a member’s pot grows, investment risk will have a greater impact on member outcomes. Therefore, the Trustee believes that a main lifecycle strategy that seeks to reduce investment risk as the member approaches retirement is appropriate. Moreover, as members approach retirement, the Trustee’s believe the primary aim of the main lifecycle strategy should be to provide protection against a mismatch between asset values and the expected costs of retirement benefits.

In view of the above, the Trustee considers the level of risk within the main lifecycle investment option in the context of the variability of returns relative to annuity prices and cash rates.

These aims are achieved via automated lifestyle switches over the ten-year period to a member’s selected retirement date for the GSK Lifecycle (pre 2014) and the five-year period for the GSK Lifecycle. Investments are switched firstly into the GSK Inflation Linked Pre-Retirement Fund, which invests in a mix of UK government bonds and investment grade corporate bonds to broadly match short term changes in the price of inflation linked annuities. In the years leading up to retirement, an allocation to a cash fund is introduced for capital preservation purposes, and to allow members to take a 25% pension commencement lump sum.

• To provide exposure, at retirement, to assets that are broadly appropriate for an individual planning to take their benefits via an inflation linked pension at retirement.

At the member’s selected retirement date, within both the main lifecycle and the legacy Lifecycle arrangements, 75% of the member’s assets will be invested in the GSK Inflation Linked Pre-Retirement Fund and 25% in a money market fund.

The Trustee’s policies in relation to the main lifecycle investment option are detailed below:

• The main lifecycle investment option manages investment risks through a diversified strategic asset allocation consisting of traditional and alternative assets. Risk is not considered in isolation, but in conjunction with expected investment returns and outcomes for members. In designing this lifecycle investment option, the Trustee has explicitly considered the trade-off between risk and expected returns. In particular, when reviewing the investment strategy of this lifecycle investment option, the Trustee considers risk quantitatively in terms of the variability of investment returns and potential retirement outcomes for members. From a qualitative perspective, the Trustee also considers risk in terms of the (mis)alignment of investments with the retirement benefits targeted by the main lifecycle investment option.

• Assets in the main lifecycle investment option are invested in the best interests of members and beneficiaries, taking into account the profile of members. In particular, the Trustee considered high level profiling analysis of the Plan’s membership in order to inform decisions regarding the main lifecycle investment option. Based on this understanding of the membership, a main lifecycle investment option that targets a pension at retirement is considered appropriate.

• Members are supported by clear communications regarding the aims of the main lifecycle
investment options and the access to alternative investment approaches. If members wish to, they can opt to choose an alternative lifestyle option or their own investment strategy on joining but also at any other future date. Moreover, members do not have to take their retirement benefits in line with those targeted by the main lifecycle investment option; the target benefits are merely used to determine the investment strategy held pre-retirement.

- Assets in the main lifecycle investment option are invested in daily traded pooled funds which hold highly liquid assets. The pooled funds are commingled investment vehicles which are managed by various investment managers. The safe custody of the Plan’s assets is delegated to professional custodians, as appointed by the governing bodies of the respective pooled funds.

Taking into account the demographics of the Plan’s membership and the Trustee’s views of how the membership will behave at retirement, the Trustee’s believe that the current main lifecycle investment option is appropriate and will continue to review this overtime, at least triennially, or after significant changes to the Plan’s demographic, if sooner.

3.3 Direct Investments

The Pensions Act 1995 distinguishes between investments where the management is delegated to a fund manager under a written contract and those where a product is purchased directly, e.g. the purchase of an insurance policy or units in a pooled vehicle. The latter are known as direct investments.

The Trustee’s policy is to review its direct investments and to obtain written advice about them at regular intervals. These include vehicles available for members’ AVCs. When deciding whether or not to make any new direct investments the Trustee will obtain written advice and consider whether future decisions about those investments should be delegated to the fund manager(s).

The selection, retention and realisation of assets within the pooled funds are delegated to the respective investment managers in line with the mandates of the funds. Likewise, the investment managers have full discretion (within the constraints of their mandates) on the extent to which social, environmental or ethical considerations are taken into account in the selection, retention and realisation of investments.

The written advice will consider the issues set out in the Occupational Pension Schemes (Investment) Regulations 2005 (as amended by the Occupational Pension Schemes (Charges and Governance) Regulations 2015 and subsequent legislation) and the principles contained in this statement. The regulations require all investments to be considered by the Trustee (or, to the extent delegated, by the fund managers) against the following criteria:
• The best interests of the members and beneficiaries
• Security
• Quality
• Liquidity
• Profitability
• Nature and duration of liabilities
• Tradability on regulated markets
• Diversification
• Use of derivatives

The policy for the Plan’s DB AVC assets which are classified as direct investments are set out in this statement.
4. Supplementary information to the DB AVC Section of the SIP

There is further information contained in the document titled “Supplementary information to the Statement of Investment Principles for the DB AVCs” on the following:

- Additional Voluntary Contribution (AVC) Fund Manager Summary
- Fee Structures for Managers and Advisers

5. Compliance with this statement

The Trustee will review the SIP at least every 3 years and as soon as practicable following a significant change in investment strategy. The Trustee will take investment advice and consult with the Employer over any changes to the SIP.

Dated: 31 March 2020
SmithKline Beecham Senior Executive Pension Plan (“the Plan”)
Supplementary information to the Statement of Investment Principles

The Statement of Investment Principles for the SmithKline Beecham Senior Executive Pension Plan sets out the guiding principles upon which the Plan’s investments are made. The purpose of this supplementary information is to provide details of specific investments in place alongside other information relevant to the management of the Plan’s investments.

The Trustee has obtained written professional advice from the Plan’s Investment Consultants, Cardano, in preparing this document.

Fee Structures for Managers and Advisers

All managers are paid fees in relation to the size of assets managed. The Trustee believes that they represent competitive rates for the types of mandates awarded.

Cardano has been selected as investment adviser to the Trustee in respect of the Defined Benefit assets.

Professional advisers, including the investment and legal advisers, are paid fees using a combination of fixed fee arrangements and based on their time spent on the Trustee’s behalf. The Trustee believes that this time based fee arrangement is suitable for professional advisers as it provides a framework for ensuring a suitable amount of attention is paid to the Plan’s matters while allowing the Trustee a degree of control and predictability over fees.

Supplementary information to the Statement of Investment Principles for the DB AVCs

The Statement of Investment Principles for the SmithKline Beecham Senior Executive Pension Plan sets out the guiding principles upon which the Plan’s investments are made. The purpose of this supplementary information is to provide details of specific investments in place alongside other information relevant to the management of the Plan’s investments.

The Trustee has obtained written professional advice from the Scheme’s Investment Consultant, Mercer, in preparing this document.

Additional Voluntary Contribution (AVC) Fund Manager Summary

The majority of the fund range offered to AVC members of the Plan is accessed through a platform provided by Legal & General Assurance (Pensions Management) Limited ("L&G"). The Trustee accesses the platform via a long-term insurance contract with L&G. The fund managers for members’ additional voluntary contributions (AVCs) and the various options are shown below:

Members are able to select from a number of strategies that switch between the funds listed above. These are as follows:

- GSK Lifecycle Pension Option
- Legacy Option
- GSK Lifecycle Drawdown Option
• GSK Lifecycle Cash Option

The GSK Lifecycle The GSK Lifecycle Pension Option is explained in Section 3.2 of this document.

GSK Lifecycle Drawdown Option

The GSK Lifecycle Drawdown option comprises of 75% GSK Global Equity Index Fund and 25% GSK Diversified Growth Fund until the member is 5 years from their Normal Retirement Date or their selected Target Retirement Date, in order to build up their account during the “growth phase”.

During the 5 years up to this date, the member’s account will gradually be switched to the GSK Retirement Income Fund and GSK Cash Funds (according to the table below), to reduce the level of investment risk and volatility of investment returns as members approach retirement. The option retains exposures to growth assets.

GSK Lifecycle Cash

The GSK Lifecycle Cash option comprises of 15% GSK Global Equity Index Fund and 25% GSK Diversified Growth Fund until the member is 5 years from their Normal Retirement Date or their selected Target Retirement Date, in order to build up their account during the “growth phase”.

During the 5 years up to this date, the member’s account will gradually be switched to the GSK Cash Fund (according to the table below), in order to protect the value of their account. At retirement date the option is invested completely in cash.

Fee Structures for Managers and Advisers

All managers are paid fees in relation to the size of assets managed. The Trustee believes that they represent competitive rates for the types of mandates awarded.

Mercer has been appointed as the investment adviser for the money purchase assets of the defined benefit section (DB AVCs).

Professional advisers, including the investment and legal advisers, are paid fees using a combination of fixed fee arrangements and based on their time spent on the Trustee’s behalf. The Trustee believes that this time based fee arrangement is suitable for professional advisers as it provides a framework for ensuring a suitable amount of attention is paid to the Plan’s matters while allowing the Trustee a degree of control and predictability over fees.
